JUNIOR FULL STACK SOFTWARE DEVELOPER

PERSONAL PROFILE

As a junior full-stack software developer transitioning from a successful career in the service industry, I bring a unique blend of interpersonal skills and a fervent passion for coding. With a dedication for technology, I've devoted my personal time to learning web technologies and languages such as, C#, HTML, CSS and JavaScript. I thrive in fast-paced environments with an eagerness to learn and grow, and a desire to collaborate and communicate effectively in a team-setting . My transition into coding stems from a deep-rooted desire to leverage technology to create positive solutions and improve people's lives. I am enthusiastic about contributing my diverse skill set to produce a meaningful impact in the tech industry.

PROJECTS

Music Library Application

A web application designed for users to create their own musical digital libraries. The app follows a basic CRUD format and enables users create musical libraries, share with other users, and store concert photos. With a complex calendar feature, users can also monitor upcoming concerts, and set reminders. The application is focused on the music industry, but can be replicated to fit other important industries.

Summit Soundstage

Summit Soundstage is an intuitive web application designed for music lovers and event organizers alike. Explore upcoming concerts, and access detailed information about artists, performances, and the venue. Whether you're an admin looking to update your site, or a user looking to discover and make purchases, the user-friendly navigation will ensure you never miss a beat.

EDUCATION

NEWFORCE, APRIL 2024 -PRESENT

Software Development Training Program
In Partnership with MountWestCTC

UNIVERSITY OF VERMONT, 2016-2020

Burlington, Vermont
Bachelor of Science in Exercise Science

TECHNICAL EXPERIENCE

Junior Full Stack Developer

NewForce   *Aug 2024-Present*

Intensive full-time 6-month software development immersive training program focusing on full stack (C#/.NET) development fundamentals and problem solving. The final half of the program is executed in a simulated company environment with Scrum methodology.

- Applied object-oriented programming fundamentals through team-based projects that reflect real world business problems
- Collaborated remotely on projects using Slack and Zoom
- Managed source code version control with Git/ GitHub
- Applied JavaScript, HTML, and CSS fundamentals to build a feature-rich social media dashboard
- Leveraged native ES6 module bundling to build DRY, reusable components
- Designed and built single-page applications with React using Hooks
- Designed applications through white boarding dependencies and building ERD's
- Built and interacted with databases using SQL and ADO.NET
- Developed a blog management platform in ASP.NET, MVC, and Razor templates in Visual Studio 2019
- Created RESTful Web API with C#/ .NET Core and connected it to a React front-end
- Built and maintained integration tests in .NET Core
