JUNIOR FULL STACK SOFTWARE DEVELOPER

PERSONAL PROFILE

As a resourceful, precise, and constantly curious junior full stack developer, I'm passionate about connecting people through technology in our increasingly disconnected world. I would love the opportunity to bring the lessons I've learned from my multifaceted life experiences and my enthusiasm for continued growth in software development to an organization where I can help craft powerful solutions.

PROJECTS

Gluten Free MOV (Personal Capstone)

This front end project in ReactJS, HTML5, and CSS provides community connection and curated restaurant reviews to the Gluten-Free Community in the Mid-Ohio Valley. It features login validation, authoritative restaurant reviews with menu items and photos, including 1-5 star rating, review comment section where users can also leave their own comment, form to request review of restaurant, and message wall with full CRUD capability.

<https://github.com/CalBoyt/Gluten-Free-MOV>

Scrapbook(Personal Capstone)

This full stack project in C#.Net 8 and ReactJS using ASP.NET, SQL, and Web API allows users to interactively share memories, called scraps, with extended family. It allows users to search for content by keyword and features GUID for each extended family and full CRUD capability.

EDUCATION

NEWFORCE, AUG 2023 -PRESENT

Software Development Training Program In Partnership with MountwestCTC

UTAH VALLEY UNIVERSITY

Multi-Media Communications Technology

TECHNICAL EXPERIENCE

Junior Full Stack Developer

Aug 2023-Present

NewForce

Intensive full-time 6-month software development immersive training program focusing on full stack (C#/.NET) development fundamentals and problem solving. The final half of the program is executed in a simulated company environment with Scrum methodology.

- Applied object-oriented programming fundamentals through team-based projects that reflect real world business problems.
- Collaborated remotely on projects using Slack and Zoom.
- Managed source code version control with Git/ GitHub.
- Applied JavaScript, HTML, and CSS fundamentals to build a feature-rich social media dashboard.
- Leveraged native ES6 module bundling to build DRY, reusable components.
- Designed and built single-page applications with React using Hooks.
- Designed applications through white boarding dependencies and building ERDs.
- Built and interacted with databases using SQL, LINQ, and ADO.NET.
- Developed a blog management platform in ASP.NET, MVC, and Razor templates in Visual Studio 2022.
- Created RESTful Web API with C#/.NET 8 and connected it to a React front-end.
- Built and maintained integration tests in .NET 8.
