## JUNIOR FULL STACK SOFTWARE DEVELOPER

## PERSONAL PROFILE

Breathing in new challenges feels like getting a gust of fresh air, allowing me to see things from a new perspective. Being adaptable and careful by nature, I've learned to look at situations through different lenses. I'm all about the journey of learning and growing as individuals. That's why you'll often find me lost in books or diving deep into online rabbit holes – it's my way of exploring and picking up new insights for life's adventure.

## PROJECTS

### FutureFundr - 2023

This application serves as an Idea funding platform meant to connect creatives of all types with investors to breathe life to their blueprints. Investors will be able to log in and view categories to invest in such as technology, finance, art, and business.

If an investor wants to invest or purchase the idea then an email containing the designated terms is sent in the click of a button. Details such as forms are emailed with an appointment time that is set to finalize the deal with the creator after clicking the "Fund" button. This app can be used to bring the future to today by connecting under funded creators with eager investors.

### InviteOnly - 2024

InviteOnly is an application meant for users to be exclusively invited by other users. Functions to operate would include a log in that leads to new users being introduced to a private general community of which they may or may not be familiar with.

The dream of the application is to have everyone in the world in the general chat at once. Communities can grow outside of the general chat and be created by members which would be on a selective dashboard (similar to the application slack).

This apps purpose is to connect the world into one chat with room for other communities one person at a time, by invite only.

## EDUCATION

### NEWFORCE, AUGUST 2023 - MARCH 2024

Software Development Training Program
In Partnership with MountwestCTC

### CYFRIN UPDRAFT, MARCH 2024 -PRESENT

Web 3 Software Development Training Program
Created with Cyfrin

## TECHNICAL EXPERIENCE

### Junior Full Stack Developer

*NewForce*                                                 *Aug 2023-Present*

Intensive full-time 6-month software development immersive training program focusing on full stack (C#/.NET) development fundamentals and problem solving. The final half of the program is executed in a simulated company environment with Scrum methodology.

- Applied object-oriented programming fundamentals through team-based projects that reflect real world business problems
- Collaborated remotely on projects using Slack and Zoom
- Managed source code version control with Git/ GitHub
- Applied JavaScript, HTML, and CSS fundamentals to build a feature-rich social media dashboard
- Leveraged native ES6 module bundling to build DRY, reusable components
- Designed and built single-page applications with React using Hooks
- Designed applications through white boarding dependencies and building ERD's
- Built and interacted with databases using SQL and ADO.NET
- Developed a blog management platform in ASP.NET, MVC, and Razor templates in Visual Studio 2019
- Created RESTful Web API with C#/ .NET Core and connected it to a React front-end
- Built and maintained integration tests in .NET Core
