LOGAN VAN METER

(540)-664-7441

JUNIOR FULL STACK SOFTWARE DEVELOPER

PERSONAL PROFILE

As full-stack software developer with a background in event production and management, I bring a unique blend of creativity, technical expertise, and real-world understanding to projects.

My journey from orchestrating seamless events to crafting elegant software solutions has equipped me with a diverse skill set and a keen eye for detail. Whether it's designing intuitive user interfaces or architecting robust backend systems, I thrive on the challenge of transforming ideas into functional and impactful products.

I am deadline driven and understand the importance of effective communication, meticulous planning, and adapting to dynamic environments.

PROJECTS

Barkeep

Tech Stack: C#/.NET - React - Bootstrap A comprehensive bar and inventory management software coupled with a user-friendly point-of-sale system. Barkeep aims to streamline operations for bars and restaurants by offering robust inventory tracking, real-time sales analytics, and an intuitive POS interface for efficient customer transactions. Designed to enhance operational efficiency, inventory accuracy, and overall customer satisfaction.

NEWFORCE, AUGUST 2023 - PRESENT

Software Development Training Program In Partnership with MountwestCTC

JAMES MADISON UNIVSERSITY 2007 - 2012

BFA Fine Arts

TECHNICAL EXPERIENCE

Junior Full Stack Developer

NewForce Aug 2023-Present

Intensive full-time 6-month software development immersive training program focusing on full stack (C#/.NET) development fundamentals and problem solving. The final half of the program is executed in a simulated company environment with Scrum methodology.

- Applied object-oriented programming fundamentals through team-based projects that reflect real world business problems
- Collaborated remotely on projects using Slack and Zoom
- Managed source code version control with Git/ GitHub
- Applied JavaScript, HTML, and CSS fundamentals to build a feature-rich social media dashboard
- Leveraged native ES6 module bundling to build DRY, reusable components
- Designed and built single-page applications with React using Hooks
- Designed applications through white boarding dependencies and building ERD's
- Built and interacted with databases using SQL and ADO.NET
- Developed a blog management platform in ASP.NET, MVC, and Razor templates in Visual Studio 2022
- Created RESTful Web API with C#/.NET Core and connected it to a React front-end
- Built and maintained integration tests in .NET Core
